

Berona Slates

Berona is an attractive smooth square edged fibre cement slate that is manufactured to the highest European standards.

Berona slates are lightweight, pre-holed and suitable for all types of projects. They are easy to handle and install, and are a durable and economic roofing material.

Berona slates are manufactured using Portland cement together with a non-asbestos formulation of superior blended synthetic and cellulose fibres.

The slates are pigmented during production and are fully compressed and are finished with a high quality, semi-acrylic coating to both faces and all edges.

Berona slates offer a 30 year structural and 10 year colour, manufacturer backed guarantee and conform to Class B in strength, the highest classification for fibre cement slates, in accordance with the European Norm EN 492, the highest level of European standards for fibre cement slates.

Berona slates are manufactured in accordance with the quality assurance system with a quality assurance system to ISO 9001 and to the requirements of EN 492 NT:1994 product specification for fibre cement slates and their fittings.
